
PREMIUM SEEDS CATALOGUE

2024

EcoTrio Labs

IT ALL STARTS FROM GRAIN

Welcome to EcoTrio Labs CBD seeds catalogue, your portal to top-tier cannabis seeds. We've curated a focused selection for growers at all levels, prioritizing quality, innovation, and sustainability. Our selection offers options for high-yield CBD biomass or exquisite, aromatic CBD flowers.

CBD's popularity has skyrocketed due to its potential health benefits, making it a sought-after natural remedy. This surge has made CBD farming appealing to seasoned agriculturalists and newcomers alike.

It all starts from grain: the foundation of a successful CBD farming operation lies in the quality of the seeds. Premium seeds guarantee genetic consistency, higher yields, and potent CBD-rich flowers, forming the foundation for a prosperous harvest. Farmers aiming for CBD-rich cannabis prioritize attributes like high CBD content, low THC levels, resistance to pests and disease, adaptability to local conditions, and appealing flavors and aromas to meet market demands. Balancing these factors is key to a thriving CBD farming venture.

At EcoTrio Labs, we prioritize seed quality for your success. Every seed in our catalog meets rigorous industry standards, meticulously sourced and bred for excellence. Our commitment ensures resilient plants, maximizing your chances of a profitable harvest.

KOMPOLTI PREMIUM

*Feminized
Certified in EU (blue label)*

Kompolti is renowned for its high CBD/low THC chemotype, making it compliant with European regulations that restrict THC levels to below 0.3%. However, its open cultivar status once led to poor-quality seeds flooding European market. Ecotrio Labs committed to restoring Kompolti's legacy and reputation, meticulously selecting phenotypes and stabilizing the cultivar.

Our efforts paid off. The revamped Kompolti plants exhibit homogeneity, robust and vigorous growth, resulting in healthy, high-yielding crops that meet the demands of both commercial and small-scale hemp farming.

These plants produce dense, resinous flowers, which exude a delightful aroma, characterized by citrusy and subtle floral notes, appealing to both farmers and consumers.

TOTAL CBD	up to 7%
TOTAL THC	< 0,3%
RATIO	1:23
YIELD	350-500 gr/plant outdoor
FLOWER	dense, resinous, medium size
AROMA	Fruity, citric
TERPENS	Limonene, Linalool, Humulene

CARAMELO CBD

Feminized

Selecting and stabilizing a CBD cultivar demands patience, dedication, and a profound grasp of cannabis genetics.

Introducing CARAMELO CBD, a meticulously crafted strain that has inherited the finest traits from its lineage: this variety is a stabilized hybrid between a land-race called "Sweet" in her homeland in Georgia and improved by selection Kompolti, certified in Europe.

CARAMELO has impressive high THC:CBD ratio, robust morphology that enhances resistance to environmental stressors, and gorgeous emerald-green buds that are well-formed and resinous. This cultivar excels in both high-CBD biomass production and premium flower production, adhering to regulatory-approved THC levels (<0.3%).

But what makes CARAMELO special is its' intense sweet aroma, evoking comparisons to caramel candy with a touch of mint, as attested by our testers.

TOTAL CBD	up to 8-12%
TOTAL THC	0,3%
RATIO	1:25
YIELD	up to 700 gr/plant outdoor
FLOWER	dense, resinous, large to medium size
AROMA	Intense sweet, smokey, mint
TERPENS	Linalool, a-Pinene, b-Myrcene

FRUIT CAKE CBD

Feminized

1

FRUIT CAKE is a stabilized cultivar, crafted by crossing Cherry Pie, Harlequin CBD and industrial hemp variety.

FRUIT CAKE adapts to various climate conditions, has sturdy structure and produces large, chunky buds that excel in both flower and biomass production.

Its potent fragrance draws parallels to the enticing scent of a spicy fruit cake.

FRUIT CAKE variety can be sold only for the countries with THC legal limitations <1%.

TOTAL CBD	up to 16%
TOTAL THC	<1%
RATIO	1:20
YIELD	up to 700 gr/plant outdoor
FLOWER	dense, resinous, large to medium size
AROMA	Fruity, spicy, citric
TERPENS	Limonene, a-Pinene, b-Myrcene

WHO WE ARE

EcoTrio Labs, S.L, based in Spain, is the company specializing in the research and production of premium cannabis seeds, one of a few producers licensed by the Spanish Government. We maintain a steadfast commitment to the highest quality standards, aiming ourselves as a premier European producer of feminized cannabis seeds.

TOP QUALITY

Excellent natural conditions, modern in-door technologies, solid plant genetics and in-depth experience of our team and partners allow us to grow plants of the highest possible standards, which is confirmed by Global G.A.P. certificate.

ORGANIC

All components that we use on each production stage are 100% organic and certified in EU. Our products are tested for microbes, pesticides and heavy metals.

ECO FRIENDLY

We respect nature and aim to make our production 100% sustainable.

INNOVATION

We constantly search for innovations in hemp industry and implement best practices in our production and management processes to improve product quality and increase sustainability.

SOCIABLE

We work for the benefit of society, being reliable partner, responsible company, caring employer and providing great experience for our customers.
